

2026

3rd Annual Meeting

MAR 6-8, 2026 • THE WESTIN DENVER
DOWNTOWN

1672 Lawrence Street, Denver, CO 80202

About AVANS

The Association of VA Neurology Services (AVANS) is a 501(c)3 nonprofit organizations dedicated to supporting the professional development needs of those working with veterans with neurological disorders. Membership is open to all disciplines working within neurology (including support staff) and is *free for 2026*.

While many of the members and leaders of AVANS are VA Healthcare System employees, AVANS welcomes any and all healthcare professionals who support veterans with neurological disorders. We provide a professional network and educational opportunities that empower healthcare professionals to provide an end goal of the best available care to veterans.

A special thank you to Rick Ryan from WSI PBG, LLC for his vision of a neurology-specific VA network, to our board members for their incredible time and energy to create AVANS, and to our Founding Partners who made our initial years possible and are an integral part of our growing success.

We encourage you to share AVANS with your peers (particularly while they can join for free!) and help us develop meaningful connections to share best practices and provide optimal care to veterans.

Non-CE Symposium

UPDATING THE ALZHEIMER'S DISEASE PATIENT JOURNEY: PRESENTING PIVOTAL AND LONG-TERM EXTENSION RESULTS & AN ADDITIONAL DOSING OPTION FOR CONTINUED TREATMENT

Saturday, March 7, 2026

7:00am - 8:00am

The landscape of Alzheimer's disease (AD) care is rapidly advancing, leading to new approaches that support earlier diagnosis and continuous treatment. This presentation explores the latest clinical insights shaping early AD management, which include additional options for ongoing therapy and maintenance dosing.

During this program, we will review the patient journey, the steps to treatment with a therapy, and discuss the topics below:

- Strategies for identifying patients in the early stages of AD using advanced biomarker testing
- Criteria for selecting appropriate candidates for therapy
- Practical considerations for initiating and maintaining treatment, such as different dosing options and at-home administration
- Key findings from a pivotal and long-term (48-month) extension study
- Approaches to reducing barriers to access and supporting health equity in AD care

Presented by:

Salina Yip, PharmD

Health Economics & Outcomes Director, Eisai

Craig Plauschinat, PharmD, MPH

Director of Health Economics, Outcomes Research, and Real-World Evidence, Eisai

FORWARD OPEN LABEL STUDY: EVALUATING THE EFFECTIVENESS OF BOTOX® COMPARED TO TOPIRAMATE FOR HEADACHE PREVENTION IN ADULTS WITH CHRONIC MIGRAINE

Saturday, March 7, 2026

12:30pm - 1:30pm

During this program, we will explore the latest data driving change in chronic migraine prevention and discuss the topics below:

- Understanding of pivotal clinical trial for BOTOX®
- Patient journey & address unmet needs to elevate the standard of care
- Deep-dive review of FORWARD Open Label Study- defining effectiveness with efficacy and tolerability; why clinical utility matters in chronic migraine
- Latest updates to guidelines

Learning Objectives:

- Critically assess pivotal clinical trial data for BOTOX® in chronic migraine prevention, focusing on efficacy, safety, and influence on patient outcomes.
- Evaluate and map the current patient journey for chronic migraine, identify unmet needs, and propose actionable strategies to enhance the standard of care.
- Interpret key findings from the FORWARD Open Label Study and recent guideline updates to inform best practices and optimize management of chronic migraine.

Non-CE Symposium

TRANSFORMING PARKINSON'S MANAGEMENT: THE "NEW" ERA BEYOND LEVODOPA'S 50-YEAR ANNIVERSARY

Sunday, March 9, 2026
7:00am - 8:00am

In 2025, immediate-release carbidopa/levodopa (IR CD/LD) will celebrate 50 years since FDA approval, remaining the most widely used treatment for Parkinson's disease (PD).

This program will address:

- How did the levodopa era come to be, and how did PD treatment change because of it?
- How and why do we need to find ways to improve upon this 50-year-old therapy?
- What's on the horizon for emerging therapies in Parkinson's disease treatment?

Presented by:

Stanley Fisher, MD

*VP and Head of Medical Affairs and Specialty
Pharmacy, Amneal Pharmaceuticals*
